

Blended Soils

Blended Soils Suppliers in Essex

Our fine-textured blends are perfect for multiple commercial applications

BS882 Topsoils

Our BS3882 Multi-Purpose Topsoil is a sandy loam topsoil that is produced with our PAS100 compost that is certified to BS 3882:2015 specification for Topsoil. This topsoil is for multi-purpose use and provides good support for the growth of vegetation.

6mm Screened

Our finer soil is finely screened soil is designed with precision and care, making it the ideal option for dressing lawns and nourishing flower beds.

BS882 Topsoils

This high-quality soil has undergone meticulous screening and refinement, resulting in a consistent 20mm particle size. With our 20mm Screened soil, you can count on consistent quality and performance, no matter the scale of project.

6mm Screened

Subsoil consists of a variable mixture of small particles such as sand, silt and/or clay. It often lacks the organic matter and humus content of topsoil. Subsoil is an essential part of most soil profiles, providing moisture storage and reducing the rate of water run-off.

6mm Screened

Root Zone is a mixture of Rich Soil (50%) and Sharp Sand (50%) and is ideal for use when laying turf. It is a dense, free draining mix which benefits and encourages new root growth. This product will contain some small stones (12mm – 18mm), but this is beneficial as it helps drainage.
