Shingle Suppliers in Essex

Explore Our Comprehensive range of both Primary and Washed Recycled Shingle

Primary

Primary 10mm

Primary 10mm Shingle is locally sourced, making it a premium, versatile material suitable for a wide range of construction and landscaping tasks. Its exceptional binding and compaction properties make it ideal for screeding, paving, and concreting.

Washed Recycled

Washed Recycled 10mm

A far more sustainable and environmentally responsible replacement for primary shingles for drainage or concreting.

Primary 20mm

20mm Primary Shingle, sourced from Local quarries, stands as a premium, versatile material well-suited for various construction and landscaping applications. Its outstanding binding and compaction properties make it the perfect choice for tasks like screeding, paving, and concreting.

Washed Recycled 20mm

A far more sustainable and environmentally responsible replacement for primary shingles for drainage or concreting.

Primary 40mm

Commonly used for land drainage, soak-aways and filter drainage systems. It is also used for vibropiling. Due to its attractive appearance and neutral colouring it is also widely used as a decorative aggregate for garden landscaping.

Washed Recycled 40mm

A far more sustainable and environmentally responsible alternative to primary 40mm for land drainage, and soak-aways.
